## Kansas NEA Statement – HB 2326

**Topeka-** The education community expresses their appreciation for the action taken today by the Kansas House of Representatives on House Bill 2326. This bill was amended in recognition of the consensus reached by Kansas NEA, Kansas Association of School Boards, United Administrators / Kansas and the Kansas School Superintendents Association regarding changes to the Professional Negotiations Act. This strong bipartisan vote demonstrates that a majority of members of the Kansas House of Representatives believe that educators are in the best position to determine what works in public schools.

This historic agreement was crafted in response to a request by the House Commerce and Economic Development Committee. The education community looks forward to the passage of House Bill 2326 as amended in final action on Thursday.
